

IVAN EDUARDO GONZALEZ DE LA TORRE

SOFTWARE DEVELOPER

Tubará-Colombia iegdlit@gmail.com 305-860-5697

PROFILE

"Belonging to the selected group of graduated in the governmental program in Colombia Mision TIC 2022 "

Passionate and self-taught about new technologies and their applications to improve human life. For this reason I applied and was selected into the program Mision TIC 2022.

During the program one of my favorite projects was building a platform to manage the student's grades for a university. With this app I learned about the importance of security and different roles for different user's profiles. To built it, I used python(flask), HTML5 And CSS.

Also, I learned to teamwork. My favorite Technology is python because is easy to learn and could be use in different fields in technology. However, right now I'm applying JavaScript and databases as well for a personal project. In my free time I'm learning, reading and practicing. Also one of my favorite hobbies is playing the guitar.

EDUCATION

Software Develoment

UNIVERSIDAD DEL NORTE - MISION TIC 2022

Programming Fundamentals, Basic Programming, Software Development, Web Development

COURSERA

Crash Course on Python

Artificial Inteligent

PLATZI- MISION TIC

Getting Start with Python, Math for Artificial Intelligent, python for machine learning, Artificial Intelligent with IBM watson, Data Engineering with Python

WORK EXPERINCE

Customer Support for Health Purpose

December 2019- August 2021 - Atlantic International Bpo - (5) 352400

Customer Service Representative

January 2022 - Present - Sitel - 6015242000

SKILLS

- Python
- Effective communication
- Adaptability
- Teamwork
- Problem-Solving
- JavaScript
- Css
- HTML

LANGUAGES

- Español
- Ingles
